DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5 and 7-8, drawn to process and apparatus for compressing a loading ring in a chamber to apply overburden pressure to a core sample, classified in class 73, subclass 38.
- II. Claim 6, drawn to applying lithostatic pressure due to overburden independent of the overburden to a core sample, classified in class 73, subclass 37.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I (apparatus claim 5) are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process can be practiced without an apparatus for compressing a loading ring.

Inventions I (method claims 1-4, 7-8) and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other

combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the method of I does not require application independent of core sample overburden. The subcombination has separate utility such as application to systems without the use of a loading ring.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
